

# RAL - Inflight Icing Home

The old wiki is on the sdg server ([click here](#)). Pages are slowly being migrated from it to this wiki. Please add new pages to this wiki, and not the sdg one. Contact [prestop@ucar.edu](mailto:prestop@ucar.edu) if you have questions about using the IFI space on the UCAR wiki.

## Projects

- [MICRO](#)
- [CIP](#)
- [FIP](#)
- [HIWC](#)
- [IPA](#)
- [TAIWIN](#)
- [General Project Concerns](#) - For any project specific issues that are relevant to more than one project.

## Non-Project Domains

- [Science](#)
- [Engineering](#)
- [Management / Planning](#)
- [Miscellaneous](#) - Icing Lunches, TIMS/IFI Tools Workshop, and other things that don't fit into a more specific
- [External Communication](#) - A public area of the wiki that will allow us to share information with outside groups. Currently anyone can view, but only IFI can edit.
- [Field Campaigns](#)
  - [ICICLE](#)

## Statement of Purpose

The wiki for Inflight Icing has several roles.

- Internal Documentation & Tracking - Progress on tasks should be documented on the wiki. This allows other group members to see what work has been done, what problems have arisen. This should also facilitate hand-off of tasks when necessary. This also helps us keep things from falling through the cracks, by having a single repository for knowledge.
- Collaboration - By providing a page that anyone on IFI can edit, it allows users to easily contribute to a common task.
- Document Repository - Papers, heuristics, meeting notes, plots, and other information can be put here for easy reference.

## Wiki Organization

The IFI wiki is broadly organized at the top level. Each project has it's own area as do some non-project subjects. Under each top-level area there are some common pages:

- task list - A table of every task that we want to devote substantial effort to achieving. Similar to the current CIP/FIP upgrades table.
- nascent topics - A list of topics to further investigate, things we don't have time to look at now, but don't want to forget to address at some point.
- notes - Whenever we are working on something and want to track progress, info, etc.
- (Projects only) Change Log / Release Log

Areas like Science or Engineering are not meant to restrict who participates in those sections of the wiki, but are only for organizational purposes.

**NOTE: The top level page is public. If you create a child of the top level page, it will also be public (unless you add restrictions). Please place all internal pages under the 'Internal Branch' which is a child of the top page.**
