

Wet Deposition

Aerosols

Wet deposition of aerosols is described in detail in the [CAM5 scientific guide](#).

For a list of aerosol species undergoing wet deposition, after building the model code, open \$CASEROOT/CaseDocs/atm_in. All aerosol species undergoing wet deposition will be listed in [aer_wetdep_list](#).

Gas-Phase Compounds

Wet deposition of gas-phase compounds is described in detail in the [CAM5 scientific guide](#). The scheme is based off [Neu and Prather \(2012\)](#).

For a list of gas-phase species undergoing wet deposition, after building the model code, open \$CASEROOT/CaseDocs/atm_in. All gas-phase species undergoing wet deposition will be listed in [gas_wetdep_list](#). If you want to make changes to this list, see [Updating Gas-Phase Chemistry](#).
