

Dry Deposition

Aerosols

Dry deposition of aerosols is described in detail in the [CAM5 scientific guide](#).

For a list of aerosol species undergoing dry deposition, after building the model code, open \$CASEROOT/CaseDocs/atm_in. All aerosol species undergoing dry deposition will be listed in [aer_drydep_list](#).

Gas-Phase Compounds

Dry deposition of gas-phase compounds is described in detail in the [CAM5 scientific guide](#).

For a list of gas-phase species undergoing dry deposition, after building the model code, open \$CASEROOT/CaseDocs/drv_flds_in. All gas-phase species undergoing dry deposition will be listed in [drydep_list](#). If you want to make changes to this list, see [Updating Gas-Phase Chemistry](#).
