

# JEDI Post-Release

## ▸ JCSDA-internal

- ◆ Create feature, bugfix, hotfix branches here
- ◆ Issue PRs to JCSDA-internal/develop
- ◆ Create Zenhub issues

JCSDA-internal repos are not forks of JCSDA  
(But they can still be treated as remotes from a git perspective)

# JEDI Post-Release

## ▸ JCSDA

- ◆ Changes to internal develop and master branches will be regularly pushed to JCSDA public repos
- ◆ External contributors can create PRs here
- ◆ PRs to JCSDA will be duplicated in JCSDA-internal for review
- ◆ After PRs are eventually merged in JCSDA-internal, they will be pushed back out to JCSDA (public)

**We are now working on automating this**
