

AMERICAN METEOROLOGICAL SOCIETY

American Meteorological Society Teacher Workshops

Title(s) goes here.

Monday, January 7th, 2012 (time)

Tuesday, January 8th, 2012 (time)

Austin Convention Center

“Weather is felt locally, caused globally, and understood regionally.”

Learn how you can better communicate weather and climate information to your students through talks by _____, then expand your classroom “bag of tricks” through activities and programs provided by American Meteorological Society Peer-Trainer Teachers from across the country and NWS Education Outreach staff.

The two workshops are sponsored by the American Meteorological Society. Monday’s workshop is designed for K-8th grade teachers, while Tuesday’s workshop is geared to high school science instructors, especially those teaching senior capstone science courses. Completion of either workshop will include a certificate for 3 hours of professional development. Registration is \$25 and teachers must pre-register by December 15, 2012. **PLEASE NOTE THAT THE COURSES ARE EACH LIMITED TO 80 ATTENDEES ON A FIRST-COME, FIRST-SERVED BASIS.** You can register online at <http://www.ametsoc.org/OR/index.html>. You will receive an email confirmation after registering.

All teachers participating in the workshop are invited to take part in WeatherFest, the AMS public outreach event to be held prior to the workshops on Sunday, January 6th from 12:00-4:00 p.m. This event, geared toward the general public, draws thousands of students, families, and teachers from the local community. Teachers taking part in either workshop will be invited to join AMS teachers at their booths during WeatherFest to conduct additional activities.
