## CESM2 is Released!!!

### Welcome to the CAM-chem Wiki

The **Community Atmosphere Model with Chemistry** (CAM-chem) is a component of the NCAR Community Earth System Model (CESM) and is used for simulations of global tropospheric and stratospheric atmospheric composition. Chemistry in CAM-chem is based off the MOZART family of chemical mechanisms, with various choices of complexity for tropospheric and stratospheric chemistry. The first version of CAM-chem is described in Lamarque et al. (2012).

<b>Run</b>	<ul style="list-style-type: none"><li>• <a href="#">Get a Cheyenne Account</a></li><li>• <a href="#">Quick Start - Run on Cheyenne</a> (the NCAR HPC)</li><li>• <a href="#">Home Machine</a> (fully coupled version in CESM)</li><li>• <a href="#">Glossary for **new users**</a></li><li>• <a href="#">Release Versions and Compsets</a></li><li>• <a href="#">Troubleshooting</a></li></ul>
