

Home - Web Advisory Group

The UCAR Web Advisory Group (WAG) reports to the Information Technology Council (ITC) and is chartered to develop policies and strategies, recommend technologies, and coordinate existing expertise and infrastructure related to UCAR's use of the World Wide Web, both internally and externally. The scope of the committee covers a broad range of web-specific aspects of UCAR's IT and includes hardware, software, design, and maintenance.

Attendance at meetings is open to anyone in the organization with an interest in these topics. WAG meetings rotate among the three Boulder campuses and are generally held the second Thursday morning of each month. More information can be found on the Meetings area of this site.
