Revision Control System

If you would like to contribute code back to the LTR team, please [Support](#) to request an account on our Subversion (SVN) server. Once you have access, you can check the code out via

```
https://proxy.subversion.ucar.edu/cism_MODELS/
```

Major releases are tagged at

```
tags/LTR-para/[tagname]
```

Code development typically occurs in `trunk/LTR-para` and `branches/LTR-para/branchname`. Please [communicate with the development team](#) to determine where you should make contributions.
