

Checklist of Information Needed to Display your Collection

Once your metadata records have been successfully indexed in the UCARConnect catalog, we'll need the following pieces of information to display your collection at the UCARConnect portal:

Title - a title that describes your resources in a way that's meaningful to a broad audience

Description - a short (about 2-3 sentences) description of the contents and objectives for your collection

Homepage - a url that users will go to if they click on your collection's name

Logo - a small (30x100 pixels) image for your collection or organization

Contact Name and Email - who we should contact if there's any issues with your metadata records or the pages they link to

Please provide these in an email to Julianne at jblomer@ucar.edu.
