

# GlobusArchiver.py

This is the user page for the Globus Archiver. You may also be interested in the [developer page](#).

Globus Archiver will have similar functionality to Archiver.pl

## Requirements

Before you can use GlobusArchiver.py, you need:

- Globus Command Line Interface
- Globus Connect Personal. Here are some instructions, but for RAL machines SNAT can install it for you (or eventually it might be in /usr/local)  
<https://docs.globus.org/how-to/globus-connect-personal-linux/#globus-connect-personal-cli>
-
