Logging In

⚠️ Note: Frost has been moved out from behind the CryptoCard firewall, as of 10/22/2006. You may ssh directly to either **frost.ucar.edu** or **frost.ncar.teragrid.org** which will still use your CryptoCard for authentication.

After your account is created, you also need a CryptoCard to login to Frost.

- Use ssh to login with your UCAS username and password to **frost.ncar.teragrid.org**
- Wait for the CryptoCard Challenge prompt, then enter your PIN on your CryptoCard, hit **ENT**, then type the number that appears on the card at the CryptoCard Challenge prompt.

Example:

```
$ ssh user@frost.ncar.teragrid.org
gatekeeper password: ********
Token_Response:: ###-####
```

If you experience issues with your gatekeeper password, please refer to this page on verifying or changing your UCAS password:

http://www.cisl.ucar.edu/docs/password/ucas.jsp

If you receive the 'Token_Response' multiple times in a row, try to resynchronize your cryptocard:

https://www.resync.ucar.edu/resync.html
