

Fitness Center

Employee Fitness Center

Description and Benefits:

Include an employee fitness center in the new facility. The center should provide adequate resources for employee fitness in an environment that potential won't have outside resources for exercise. Wyoming has notorious winters and employees will need indoor facilities for exercise. The facility should have full spectrum lighting to offer the benefits of outdoor activity indoors. Additionally, full shower and locker facilities would complete the facility.

UCAR/NCAR's role:

Design a full feature fitness center as part of the initial building desing. Purchase quality equipment sufficient for the proposed staffing level.
