To Add a Logbook Entry

A logbook entry is a **Blog Post** on this wiki. To add an entry:

1. Login via the link at top right
2. Select **Create**, **Blog Post**, **Create** at the top of the page.
3. Enter a title, and contents.
4. To aid in searching, add one or more labels from the following list: sonic, licor7500, krypton, trh, handar, barometer, radiation, soil, sodar, power, datasystem, network
5. If you make a minor edit to an entry or page, un-select **Notify Watchers** so that email notifications are not sent.
6. **Publish**

It can take a few minutes before the new entry is found via the search tools, or listed in index tables.

See [All Log Entries](#) for a listing of the titles of the SCP log entries.

To view the complete logbook, select on **Browse** -> **Blog** above.

See [Email Notifications](#) below, if you want to receive an email if someone adds or updates a page or blog entry. If you make a minor edit to an entry or page, remember to click **Minor Change** so that emails are not sent.

Email Notifications

To configure whether to receive email notifications of updates to this space, do the following:

1. Login
2. While viewing this page, open the **Browse** menu and select **Advanced**.
3. In the left-hand panel, click **Start watching this space**, or **Only watch space blogs**. To disable notifications, select **Stop watching this space** or **Stop watching space blogs**.

The emails will be somewhat unreadable unless you ask for html format:

1. click on your name in the upper right
2. choose, **Profile, Settings, Email, Edit**
3. select the format you want (text or html), and whether you want the full and/or changed content.
4. **Submit**
