

# Daily Status Sat 13-Oct-12

13-Oct-12

## Weather&Ops:

Some rain went through the area last night and on into today. So far the periodic showers haven't dropped anything out other than the expected krypton /licor/csat-sampling. General overcast through the day. Winds brisk from roughly w/nw. Temps above freezing roughly 3-10C

Personnel: JohnM, GordanM. SteveO left yesterday afternoon (10/12) and GordanM left today noon and has pocketec drive to upload high-rate data on Monday. He generated some 20hz netcdf data for Larry to use.
