

# Daily Status Tues 16-Oct-12

16-Oct-12

Personnel: JohnM., TomH.

## Weather&Ops:

Remained mostly clear last night with calm/light wind. Clear sky in am, warmish seasonal temps. Winds expected to pick up today and cooler tomorrow with wind. A squall with rain and frontal passage came through at ~20MST in the evening, 2Z on 17th.

## Sensors:

Overall things looking good / reporting. Nearly everything is reporting except the Picarro, which is still awaiting to be repaired at their factory.

Kryptons: voltages a bit better this morning, but we expect to clean them today..... Kryptons were cleaned at roughly 10MDT, 16Z. The voltages did come up a bit to roughly 1.2.

TRH's maintenance and weatherproofing of binder connectors will continue today causing outages.....see specific log entry table.
