

A2 CSAT Swapped

19-Oct-12 09:55-10:15 MST (15:55-16:15Z)

CSAT Removed: s/n 833 This is the unit that was glitching in higher winds. It's data was ok in light winds, but better safe than sorry. Could be used-as-last-resort if nothing else is available.

CSAT Installed: s/n 671 Gordon confirmed it was looking good from Boulder.
