

# Power Check 2012-Oct-24

Took Amperage readings for the East transformer. (readings are rounded up)

C Tower - 0.50A

OSU SODAR - 2.00A

NCAR SODAR - 2.50A

I did not take readings on West transformer due to not easy access to power lines. I may try after the storm (worried about not being able to re-cover good enough).
