

power mote at 6 out

Gordon Oct 27

The power mote at station 6 has been out since late on Oct 24. It is only providing Vdsm, so it isn't a big priority. When powered down and back up with

```
eio 7 0  
eio 7 1
```

It reports this to rserial, but nothing else:

```
ID37:\0x01\0x02Rev1.11 dr=5 EC 100mSec Bres=39999983 Mode=Timed \0x12\0x03\0x04\r  
ID37:\0x01\0x02Rev1.11 dr=5 EC 100mSec Bres=39999983 Mode=Timed \0x12\0x03\0x04\r
```
