

Daily Status, November 2

Daily status, November 2:

Weather

Overcast, clearing from west; breezy winds from the north around 4 m/s at 10 m; temperature around 10 degC.

Status

All stations (DSMs) running.

No apparent sensor issues except for occasional CSAT diagbits (A19 particularly) and intermittent Qsoil.c (which is currently running).

ToDo

Take photos of stations after lunch with Canon camera.

Start on CentNet radiometer and sonic intercomparison data analysis, which did not happen yesterday.
