

ErrorCodes

Common Error Codes with the BGL XL Compilers

Since the BGL XL compilers do not always give descriptions along with error codes, some of the more common error codes are listed here along with descriptions.

Error Code	Meaning
1525-001	The READ statement on the file cannot be completed because the end of the file was reached.
1525-006	Attempt to open file with 'status=OLD' when file does not exist
1525-014	Failure on OPEN because a file or directory in the path was not found.
1525-101	Could not read file
1525-107	Attempt to open file with 'status=NEW' that already exists
1525-108	<i>Could not allocate object:</i> There was not enough memory available to allocate an object of some sort
