

Daily Status Tues 6 November 2012

Weather:

Very pleasant out. Light winds with mostly sunny skies. ~13C w/ 25% Rh

Status:

All systems reporting. A lot of cows by water tower this morning. Hopefully, they do not have a plan to run down the fence and get into the testing area.

To Do:

- Reboot RASS for APG.
- Check on TRH confusion on main tower.
- Make my bed.
