

daily status sunday nov 18 2012

weather: lovely, morning, calm and crystal clear. Wind pick up around noon becoming fairly breezy, about 12 m/s, mostly sunny

status: all stations up and reporting

cleaned licors at 11:49

cleaned radiometers at 11:51

cleaned EC 150 at 11:55

checked main tower tensions, all looks O.K.

Ap8 EC150 boom angle 114.2 degs

Ap8 csat 111.1 degs

A11 csat 101.5 degs

M21 0.5m csat 96.1

1.0m csat 97.2

2.0m csat 99.2

3.0m csat 98.3

4.0m csat 99.5

5.0m csat 98.3

tried to shoot other angles, but winds became too gusty to trust the readings as well as angle of attack for higher sonics introduces too much error.....
