

# Daily Status Weds 7 November 2012

Chris G. and Larry present

## Weather:

Mostly sunny skies w/ cirrus. Temps just above 10C and calm winds. Looks like a good day to play frisbee golf, using the towers as holes.

## Status:

Nothing new in this category. Things are running great and smooth. We will probably run around to some towers to check on configurations to see if we can add barometers. We have the new nano barometers and EC150 up here now.

## To Do:

Work on EC150 mounting

Clean KH20, Licor and Radiometers
