

Daily Status 29 Nov 2012

Weather

The morning gives us partly cloudy skies, mostly high cirrus. The temperatures throughout the night range from about -8C to 2C. The winds stayed below 5 m/s and are presently at about 1 to 2 m/s.

Status

morning (7:30) All stations are up. No issues with the sensors.

Christoph and his crew started teardown today.

afternoon (13:30) For the afternoon entertainment, Steve O. conducted a tour of the site for Kate, Rudy, and Ned.

During that time Steve O. took a soil sample at the two soils sites and we determined the elevation between sites 16, 18, and 19.

evening (20:45) Still running like the Energizer Bunny! WInds are at ~2 m/s and are dropping.
