

## **new Tsoil.b but not settled**

This morning, I installed our last spare Tsoilx4 at soil.b. However, I want to give it some time to settle before using it. So, swapped connections with the old Tsoil.b from 10:50-11:02 (note that the new probe has ID23) to get a baseline difference. I then went back to the old Tsoilx4. My plan is to do the real switch tomorrow.
