

NEAR maintenance

Tom at near tower, Oct 2, 2013

Arrived around 12:35.

Cleaned radiometers, which were pretty clean, with fingerprints on SPN1. See an upward spike in Rpile.in at 12:44.

Cleaned krypton, signal rose from 0.12 to 1.2 V by 12:48.

Installed pressure port. All P.2m.near data up to this time should be discarded.

Left at 12:50

Returned to NEAR to raise sawhorse, but Chris could not remove one of the stakes without a crowbar.
