

Daily report follow up 15 Oct 13

When I arrived we had an issue with [metcraxii/profiler_latency_lidar/los/rtd](#) and [metcraxii/profiler_latency_lidar/dbs/rtd](#) these issues went good while I was in the trailer earlier and now are still good.

At 12:30 the solar battery charge was at 90%.

Everything looks good around all the sites.

IOP tomorrow so our checks will be after 2 pm.

wind has picked up since earlier with full sun not a cloud in the sky.

Profiler power is .142mW
