

Daily Status Update 10-14-2016

Fairly clear and cool. Light winds from the NE/NNE.

To dos:

- Reshoot boom angles at site 8 where we used tripod for stabilizing. We think tripod could be affecting the compass.
- Install wisard board on the soil TP sensor at site 1. It should arrive today.
- Clean radiometers at station 9

Ongoing:

- Watching main tower wdir data and forecasts to determine appropriate conditions to have wind turbine turned off (at the request of the PI). She's looking for ENE winds between 40-80deg

T/RH: 42m TRH still reporting warmer and drier than at other levels

P: ok
