

Daily report 7 May 2017

Day 7 of the Perdigao IOP. The weather has warmed up and become mostly clear. Upper level winds have calmed down and the sondes could be received to their burst point.

Four sondes launched yesterday and today at 00UT, 06UT, 12UT & 18UT. All systems are working.

Lou disconnected the grounding wire on the water vapor DIAL following Scott's instruction. No report of further issues.

Lou installed a few concrete bricks as steps to the trailer.

Today the local community club organized a lunch for the community and campaign participants. 7 of us participated.
