To Add a Logbook Entry

A logbook entry is a **Blog Post** on this wiki. To add an entry:

1. Login via the link at top right
2. Select **Create, Blog Post, Create** at the top of the page.
3. Enter a title, and contents.
4. To aid in searching, add one or more labels from the following list: sonic, irga, trh, barometer, radiation, soil, power, datasystem, network
5. If you make a minor edit to an entry or page, un-select **Notify Watchers** so that email notifications are not sent.
6. **Publish**

It can take a few minutes before the new entry is found via the search tools, or listed in index tables.

Blog Posts is a click-able listing of the titles of all log entries.

To view all logbook entries inline, select on **Browse -> Blog** above.

See **Email Notifications** below, if you want to receive an email if someone adds or updates a page or blog entry.

Contents

As you add pages to your space, they will appear here in a page tree browser.
