CCWG wiki pages

Coordinator: Gary Strand (strandwg@ucar.edu)

A "wish-list" from the CCWG. primarily involving data management:

1. CAM calendar (mm/01 vs. (mm-1)/15) [check time_bounds, NN CCSM standards doc on WWW]
2. CAM subdaily tapes in monthly/etc. format [good idea!]
3. Larger tapes generally (archival efficiency)
4. ByVar format (run time?) [Do with harvester - see BGC experience]
5. Lightweight diagnostics stream(s)[Difficult because of gather/perf issue, Perhaps in coupler?]
