# **CCSM Software Engineering Group**

## **CCSM Software Engineering Page:**

These are WIKI pages for CCSM Software developers to communicate in an easy free-flowing format, that also keeps track of who/when/what changes were made.

#### Requirements:

- CCSM Scripts Requirements
- CCSM Testing Requirements

#### **CSEG Procedures:**

- CCSM Management Issues
- CCSM Development Versions Machine Port Procedures

#### Project pages:

- CCSM4.0 Task List
- CCSM-MCT Sequential CCSM
- CCSM-ESMF Stage-1 Project
- CCSM-ESMF Stage-2 Project
- CCSM Move to Subversion Project
- CCSM New Land Initialization
- CCSM Performance Timer Unification
- SCD New Machine Acquisition Support
- CLM Fine Mesh Project
- CCSM Single Executable, Concurrent, with Data6 and POP2 Project
- Dust and Carbon deposition to surface models Project
- CLM Canopy Air Space Project
- Data Model v7 Project
- Production Run Database Project
- Parallel I-O
- CCSM on BlueGene
- CAM3.5 Aerosol Datasets
- Improvements to Short-Long Term Archiving
- CCSM Component Logging and Unit Handling
- CCSM high res
- CCSM4 scripts update

### CAM projects:

- Refactor phys\_buffer
- Allow non-rectangular lat-lon grids
- Gather-scatter interfaces
- Implement HOMME dycore
- Cleanup of FV dycore interface
- Implement FVCUBED dycore
- Refactor the configure script
