

# OTREC AVAPS Dropsonde Data Flow Chart

OTREC AVAPS Dropsonde Data Flow Chart

OTREC AVAPS Dropsonde Data Flow Chart

The sounding QC laptop will have a drive letter N: configured, which points to Synch\_to\_Boulder\EOL\_data\AVAPS\_data\ on the NAS in the operations center. This way the drive N: will only show the folder \dfiles, \prelim\_qc, \tempdrop, \bufr, \skewt, and \raw\_data. These folders will be synced to Boulder.
