

# Quickie status

s4, s8, s10, s15 all coming in. s17 had a few samples come through Sat afternoon, but nothing recent.

s8 IP address: 166.255.144.44

Ott: all okay, reporting 0.

TRH: s8 TRH is reporting -99 for Rfan, which is supposed to mean that the fan is not turning. Others okay.

P: all okay

CSAT: all okay

EC150: s8 all bad values (including Tirga and Pirga)

Victron: all okay (need to look at parsed DIDs 61-65 to get all fields)

Gill 2D: all okay

NR01: all okay

Tsoil: all okay

Gsoil: all okay (all same sign, so far)

Qsoil: all okay

TP01: all okay

\*\* Need boom directions for CSATs and Gills to process directions properly
