

Status - Mar 20

s1: not reporting. Last message (18 Mar) missing P, Vbatt was okay.

s3: all working

s4: all working

s8: ec150 not installed

s10: all working

s14: P, TRH, mote all down (mote has a lot of 0x00 characters before message)

s15: Qsoil needed power cycle

s17: not reporting, suspect DSM usb issue. Last message (13 Mar) had bad TRH fan, RH questionable, missing Ott, missing TP01 (might just have been timing, since prior message was okay), Vbatt was okay
