

19 Oct 2020 Teardown

Weather: Cool and foggy morning followed by hot, sunny, and calm conditions.

Tasking:

- S17 (Cuyama Peak) teardown. Approx. 3.5 hour drive one way. Upon arrival, found the cables in ports 5 & 7 had been yanked hard enough to remove the pins from the connector. Suspected vandalism. DSM was locked up, potentially from this incident. Teardown went smoothly.

Plan for tomorrow

- S1 (SBC Fire Station 18) teardown.
