[Turbulence Tower Plots \(NCAR/EOL\)](#)

[Turbulence Tower 5-minute Data, Ascii/NetCDF \(NCAR/EOL\)](#) - Contact Ned Patton (patton at ucar.edu) for access

## Field Logbook

To enter a blog entry:

1. Login via the link at top right
2. Select **Add, Blog Post** from the upper right menu
3. Enter a title, and contents.
4. To aid in searching, use one or more of these one-word labels in an entry: **network, power, walkuptower, turbtower, sonics, trh, licor7500**. Wiki administrators can add more labels under **Browse, Space Admin**. You can also create your own labels.
5. Save
6. It can take a few minutes before the new entry is found via the search tools, or listed in the following pages:

Generally don't edit the following four pages, they only contain an instruction to list blog entries.

See [All Log Titles](#) for a listing of the titles of all the log entries.

See [Walkup Tower Entries](#) for a listing of titles of entries with a label of "walkuptower".

See [Turbulence Tower Entries](#) for a listing of titles of entries with a label of "turbtower".

See [All Log Contents](#) for a page displaying all the log entries. This will be slow to render as the logbook becomes large.

## ToDo Lists

Turbulence Tower ToDo

## Index

Entries with a icon containing a "12" are blog posts. Others are web pages.
