NCAR HPC User Group Home

Welcome to the NCAR HPC User Group wiki. In this space we curate our proceedings and more persistent materials. You should be able to comment in this wiki if you're logged on. Since March 2022 we are opening up NHUG participation to all of our current users of supercomputers and data analysis systems.

1. Please use **NHUG Slido** for your questions and/or ideas during upcoming meeting. Tell us what you want us to cover during the meeting, suggest any focussed topics that you feel is not getting enough of our attention.
2. We encourage you to join **NCAR HPC User Group NCAR HPC User Group Slack channel channel** which we will use for focussed interactions during and outside the monthly meetings. Please note however that this is a user forum so please choose your topics / threads accordingly. This space should not be considered as a replacement of our ticketing system.
3. The meeting proceedings i.e. recordings, transcripts and other more persistent materials will be curated in this wiki under **corresponding meeting pages**. The contents that are older than a year will end up in corresponding year folder under **archive tree**.
