Memorial Hill sensors

In today's meeting with the PIs, Memorial Hill will have:

CSAT3A/EC150/EC100

Nanobarometer

TRH.2m

OTT

and possibly host a PI camera

It will not have:

CS125

TRH.0.5m

NR01

Soils

Snow depth

Currently, cfact.xml doesn't know this, and will just report that no data are coming in for these sensors. We could create a separate DSM type for this site to avoid this problem.
