

Teardown day 9

(late posting of this message from Friday)

On site: Steve, Chris, Tony, Clayton, Dexter (Matt left today)

Removed all stuff from DCS tower site, including spooling cables. Removed all stuff from storage. Final packing of base and both Penskes. Base departed. We departed – one Penske went to St. George on Friday night, the other arrived in Boulder.

CFACT is over! (Though I still need to send follow-ups to landowners.)
