

## Wrap up 3

The trailer and pods are ready to go. Took a picture of the power usage and emailed to John.

The bolt that holds the back stairs of the trailer is missing... and the arm that it is attached to is seized up. I have it safely stowed with chain, lock and straps. Trailer pickup is scheduled for 8am tomorrow. PODs has an all day window for pickup.

I brought the GSA in for a good washing. It is of acceptable cleanliness.
