

Teardown 9/30

...and then there were two.

Justin and I got out to the site early to prep the base trailer and clean up. Disconnected power cable from base trailer and stowed securely on reel. Locked down all panniers. Removed and disassembled patio/stairs. Closed shutters. Disassembled and stowed back stairs.

Sent off tower trailer at noon as the driver was in town already. Scheduled base trailer pick up for tomorrow morning, as driver says they are arriving early as well. Containers and ISS trailer pickup is still on for Monday morning. Driver numbers for reference:
