

sites 1 and 6 prop vane azimuths

the prop vane azimuths were shot using the datascopes earlier this week with the following results

site 1 (magnetic declination set to 12.3 degs per NOAA website, and datascopes field calibrated by Chris Golubieski) 1.0 degs

site 6 1.7 degs

neither site has had this boom direction entered into the RMY propvane program as yet.
