

crontab removed

Following the wisdom of Boulder, I have just commented out the crontab entries that turn the router power off at night on hiland3. Enjoy the extra data and enjoy looking at the power consumption tonight.

TWH (1/4/11):

Highland Vdsm 1/2/11 at 19:52:30 = 12.80 V (Router turned off overnight)

lowest Vdsm 1/3/11 at 07:52:30 = 12.11 V

Vdsm loss = 0.69 V

1/3/11 19:52:30 = 12.82 V (Router left on overnight)

lowest Vdsm 1/4/11 at 07:52:30 = 12.10 V

Vdsm loss = 0.72 V
