7 Jan: Oncley&Dong

12-14cm of snow cover; hazy (near top of haze layer?)

1405-1407: stir ETI gauge (still some uncounted snow); waiting 10min for this (possibly) to be counted,

1417: remove ice from gauge

14:15 clean up radiometer

14:23 add .4 gallon eti fluid to the gauge, (ice plog is 8 inch much bigger than before), green fluid was frozen, filmed the side of the gauge.
