

# site playa1 visit

9 Jan 11, John, Steve, and Ling

1543-1550: clean up radiometers and shadow-band. Rsw.in had a few crystals on the top of the dome. Shadow-band sensor had bird droppings. Shadow band looked a bit off, but didn't change. Other quantum sensor okay.

TRH a bit noisy, but okay.

GPS jumpers were okay.

Well, we didn't get to all 7 sites, but only because ABC was locked. We'll hit it tomorrow.
