

# eslope5 site visit

21 Jan: Oncley&Militzer

Purpose: Class tour; reprogram motes; clean radiometers

Didn't record exact time, but everything done between 1300-1345. Should be able to tell from mote data.

The data may record that I did an "eio 5 0/1" cycle as a demonstration. The radiometers had been done by this time.

PS: From the data, the times of these events were:

12:57:50 rad mote restarted

13:00:15 main soil mote restarted

13:04:37 aux soil mote restarted

13:13:20 Rsw.in cleaned

13:13:40 Rlw.in cleaned

13:13:50 Rlw.out cleaned

13:13:55 Rsw.out cleaned

13:22:22 TRH eio
