

# Stn2 Visit 26Jan11

26Jan2011 10:00-10:15 local Militzer

Conditions: very foggy, calm

Purpose: Check radiometers, solar panels and measure snow

PV: solar panels have cleared off from the snow yesterday...no problems

Snow Depth: very little left, just a little bit but spotty around rad. 3/4" was deepest patch i could find next to rad.

10:09: Rad Rsw.in had light frost covering cleaned off with methanol. Other sensors were clear.

Kh2O voltage zero, wet in fog. no 2nd person to lower tower
