Alternatives to UCAR Dial-up Remote Access

A declining user base, excessive cost per user, and budget limitations have led to the decision to decommission UCAR's Level 3 Dial-up Remote Access service (http://www.cisl.ucar.edu/cpg/ras/) on May 1st, 2011.

This page is intended to be a quick reference of possible alternatives to UCAR's Level 3 Dial-up Remote Access service. If you know of a solution please update this page with the details.

Solutions

1. Individual Dial-up account
   a. ArcZip - ArcZip can provide individual dialup accounts for about $15 per month. They are not the cheapest, and I do not have any personal experience using their service, but they have received positive reviews in a number of forums. Reviews of other dialup service providers can be found here.
2. Tethering to a Smartphone
3. Wi-Fi
